Soliris can lower the ability of your immune system to fight infections, especially 
meningococcal infection, which requires immediate medical attention. If 
you experience any of the following symptoms, you should immediately call 
your doctor or seek emergency medical care, preferably in a major 
emergency medical care center:

- headache with nausea or vomiting
- headache and a fever
- headache with a stiff neck or stiff back
- fever
- fever and a rash
- confusion
- muscle aches with flu-like symptoms
- eyes sensitive to light

Get emergency medical care right away if you have any of these signs or 
symptoms and show this card.

Keep this card with you at all times, even if you stop using Soliris. Your risk of 
meningococcal infection may continue for several weeks after your last dose of 
Soliris.
Information for the Treating Physician

This patient has been prescribed Soliris® (eculizumab) therapy, which increases the patient’s susceptibility to meningococcal infection (*Neisseria meningitides*) or other general infections.

- Meningococcal infections may become rapidly life-threatening or fatal if not recognized and treated early
- **Evaluate immediately if infection is suspected and treat with appropriate antibiotics if necessary**
- Contact prescribing physician (below) as soon as possible

For more information about Soliris, please refer to the full Prescribing Information. In case of safety concerns, call **1.888.SOLIRIS (1.888.765.4747)**. In case of adverse event experiences, call **1.844.259.6783**.

Patients receiving Soliris should carry this card at all times. Show this card to any doctor involved in your health care.
